To Assist Employment

C.P.R. Spent more than \$11,000,000 on new Branch Lines and station buildings and provided 351,000 days work for men otherwise unemployed. Cooperated by doing work years ahead.

Contributed Huge Sum

Since the commencement of the Canadian Pacific Railway has spent a matter of eleven to twelve million dollars in providing work for unemployed Canadians. When it was apparent in the late summer of 1980, that certain areas of southern Saskatchewan were to suffer from almost complete crop fallure, the Company took upon itself to assist the people in that territory by beginning the construction of a branch line between truction of a branch line between truction of a branch line between the construction of a branch line between the

Death Ends Career of Thomas A. Edison Sunday Morning

Thomas A. Edison died at 3.24 s.m. Sunday, at West Orange, N. J. His wife, six children, his physician and two nurses were at the bedeide when tht end came. Thus ends the career of the man famous for invention of the incandescent lamp, the first form in which electric light of present day usage was known to the world.

Fortnightly Crop Report

Since October 9th, warm bright weather has prevailed through out Alberta and during the past week excellent progress has been made with threshing. In the Peace River district about 80 per cent of threshing has been completed, and a large part of the grain remainwhere progressing aspidly. The amount completed varies from 15 to 50 p.c. with an ave-Board in Automobile rage of about 40 p.c. In the central part of the Province about 75 p.e. of all grains are threshed, while in the south Calgary, Monday evening, Mr. threshing has been completed Murray of Gleichen who was for some time.

daiving his own car met in a In central and southern Alber head-on collision with a car ta and the Peace River district bound for Calgary. The accid- a considerable percentage of ent happened about a mile west early threshed wheat graded of the thirteen mile corner. Mr. tough. At present however, Murray was just coming over practically all wheat is receive road, and before the car could the percentage of the total erop be stopped, collided head on. In grading tough and damp will Mr. Murray's car were his wife be comparatively small. A large and family and outside of a few percentage of the wheat being bruises, they were very lucky marketed at present grades No. 1 and 2 Northern.

Yields reported at various points indicate that the Federal Bureau of Statistics estimate of 17.5 bushels per acre throughout the Province will be sus tained. Lacombe reports yields of from 30 to 75 bus of wheat, 50 to 100 bus, of oats and 30 to 60 bus. of barley.

At Vermilion the estimated average yield of wheat is 30 bus, per acre and in the Peace River district an average of 20 bus. of wheat. 40 bus. of oats per acre are being obtained.

The greater part of the potato and root crop has already been harvested and excellent had a telephone installed a few yields and good quality are days ago. Everybody will get reported. On the irrigated districts threshing of sweet clover and alfalfa for seed is well advanced.

The next meeting will be held on Friday, October 23rd.

A letter of thanks has been Red Cross.

Surprise Party for Beynton Chrestensen

On October 16, a surprise party was held at the home of Mr. L. F. Chrestenson in honour of the fourteenth birthday of Boynton. Decorated in true Hallowe'en style, the house presented a very inviting appearance to the many friends who were guests.

The evening's program consisted of games, contests and a thrilling visit to Bluebeard's Den where the heads of his murdered wives and Bluebeard himself caused the hair of the guests to stand on end. The enjoyable evening was brought to a close with a delightful lunch and sing-song, everyone wishing Boynton many happy returns of the day.

The following were at the

party:

Misses Carol Chrestenson, Eileen Chrestenson, Elma Connel. Wills Lieth, Irms Armey. Theima Miller, Mildred Kauffman, Margaret Oliver, Edna Beagle, Vera Hesketh, Audrey Ward, Mary Dumka, Evelyn Burriss, Marjorie Leonard Irene Hesketh, Ruth Brubaker, and Dorothy Brown. A World Citizen

The passing of Edison may well cause the world to mourn. It was fitting that all lights in the States should be turned off a moment in honor of such man. Indeed it is given to few men to produce so much for the benefit of all. He served the la boring man as wellas the monied magnate. Let unstinted praise be his. .

But his work causes one to reflect, is mechanistic progress the only progress or the greatwords have more power than locomotives and ideas than armies. Luther's "justification by faith" wrought a greater change in Europe than the automobile has on this continent. Newton's discovery of the law of gravitation may rightfully be considered greater than the discovery of the electro-magnet. In fact all modern science stood impotent before the French spirit at Verdun. 1ben let us remind ourselves that life is more than machinery and there are discoveries in other spheres than mechanics. Nevertheless gratitude to the Almighty should well up in our hearts for giving us such men as Thomas A. Edison.

Blessed Errors

And We Mean It Too

The other day we assisted in a bit of printing. 'All day we replaced letters and finally benot think. Then that we coul Then that night those little pieces of metal took life and chased each other around the bed. But when it was all over and we had time to think we bowed revently before the possibility of being able to correct mistakes.

No, not the cantankerous fault-finder who always contradicts or has something better to offer. We were going to say the professional fault finder but that seems to imply that by this means that they earned their living. And perchance they leave that impression by the zeal with which they prose-cute their art. In reality their returns are neither in cash nor

But what gives more pleasure than to be able out of our knowledge of the locality to set some stranger upon the right road again? Or we know something about gas engines and we see some one trying to start one. We discover what is wrong and with an adjustment here and a turn there and away it goes. Then sometime without letting the writer know that we have interchanged the "i' and the 'e' we have saved him from the causticremark of some pedant reader. Yes, and to take some piece of work that un-skilled hands have messed terribly and straighten it out so that no traces of the confusion remains—that is a work of God.

range Ed .. Das

KA THE KINST

But we all make mistakes and create tangles. And great as it is to correct the errors of others, it is greater to correct oneself. We think it nice not to make mistakes but there is a cold inhumanity in the "fault-lessly faultless." And that only in contemplation for we have not met the person, All our acquaintances have many faults whether they see them or not whether they see them or not. So blessed is the man who can discovered his own errors and correct them.

In Canada, approximately 109,000 deaths occur each year. come from someone whe has Out of the total number, just over 8,000 are the direct result of tuberculosis. In our campaign against this disease, we are encouraged to know that, despite the heavy toll of human lives which tuberculosis continues to take, the number has nevertheless been greatly reduced. Year by year, the ravages of tuberculosis are being lessened.

But what of those individuals w ho make up the present number of victims? Can nothing more be done for them than is being done? We have no specific means of prevention against tuderculos, nor has there been discovered. as yet, any specific remedy to cure the dise ase. Tuberculosis is fought and fought successfuly, through leading a hygienic life.

The person who has developed tuberculosis and who goes to a sanitorium for treatment, is not given drugs or other remedies. The treatment consists of rest. fresh air and proper food. He lives a hygienic life and takes an additional amount of rest. Rest is necessary in order to allow the diseased part to heal.

The power of nature to overcome tuberculosis and bring about a cure is great. The disease is generally a long drawn-out conflict between the germ of the disease and the body. The body stands an excellant chance of winning, proto do so through rest, fresh air, years ago. and proper food.

germs of tuberculosis which the disease, to which is added failure to live a healthy life, giving the germs their chance to multiply and cause trouble.

Most of the deaths which now occur are due to the failure of the individual attacked secure treatment early. Safety demands prompt attention; danger follows delay.

In order that cases may be treated early, it is necessary that they be recognized early. This means that the case must go early to his doctor and be examined. The person who goes to his doctor once a year for a health examination gives of 60 workers. the physician the opportunity to discover such diseases as tuberculosis in their early stages, and so secure early treat ment.

The person who has a persis tent cough, or who has lost weight, or who finds that his ordinary work tires him when it did not do so formerly should realize that such conditions are suggestive of tuberculosis. They may not be, but if they are the sooner it is known the bet ter, for then treatment can be started.

If tuberculosis does occur safety lies in prompt treatment and in nothing else.

Machines Instead of Hand Work

One power shovel today can excavate as much dirt on the vided, at an early stage of the city streets as it required 200 disease, it is given a fair chance unskilled laborers to shovel 30

Feeding Pullets for Winter Egg Production

During the late fall and winter months as a general rule egg prices are very much higher than at any other time throughout the year. Every poultry raiser should realize, therefore that if he gets good egg production then it will pay him well. As the great bulk of the adult birds will be resting and under going moulting process during the fall and winter months, the pullets are left practically as the only source of fresh eggs at that time. Thus, the chief, concern of the poultry - keeper should be to give the pullets the best possible attention in order that they produce to their maximum capacity. Pullets should not lay until they are mature, and for this reason han he does of his live stock. poultrymen should aim to have their young stock mature be- ing the storm it may happen that the fore the cold weather begins in mimals drift against the wire fence, the fall. Early hatched pullets that start to lay in October or November are the ones to keep for egg production. It is the early hatched and fully matured pullets in good healthy condition that will produce the eggs during the fall and winter months.

Pullets require careful feed-

Pullets require careful feeding during the fall 'and winter to secure profitable egg production. They relish and do better on a variety of feeds providing these are palatable. Laying pullets should be fed a ration consisting of scratch grains and mashes, meat food, green food, mineral food, grit and drink.

At the Dominion Experimental Station at Lacombe Alberta, a dry mash mixture kept in hoppers constantly before the flock, is made up of equal parts of bran, shorts,

barley, meal and finely ground oats to which has been added about 20 per cent beef scrap. Milk replaces the meat serap when the flock can have access to all they will drink. When milk is available only part of the time about ten per cent beef scrap is added to the ground feed mixture. To this mixture is added 3 per cent bone meal, about 1 per cent fine table salt and 2 per cent cod

A home-mixed scratch grain consisting of equal parts of wheat, oats and barley is scattered in a deep litter of straw in the morning and again in the afternoon, a heavier feed given in the afternoon, than in the morning. This induces the birds to exercise, Grit and oyster shell are available in hoppers, and green feed is supplied either by alfalfa leaves or mangles, carrots, cabbage and sprouted oats.

Here and There

Maple sugar and maple syrip produced in Canada in the spring of 1931 had an estimated value of \$3,537,700 of which the former accounted for \$930,800 and the latter for \$2,606,300. The Province of Quebec is the largest producer in the Dominion.

Fellowing a long succession of shipments in an experiment commenced a year ago, thirty-five cars of beef cattle, the bulk of them for British consumption, left Winnipeg recently by special Camadian Pacific train for the Atlantic seaboard for shipment to Great Britain.

Thousands of salmon recently "took the elevator" on their way to the spawning grounds in the upper sections of the Stamp River, British Columbia, when they used the fishway built by the Canadian Government Department of Fisheries to overcome the tumbling waters at Stamp Falls.

With the departure on October 1 of the big Sikorsky amphibian plane for Boston, the Pan-Ameripiane for Boston, the Pan-American Airways concluded their service between Boston and Halifax which was inaugurated August 1. In August, 70 passengers were carried on the southbound trips and 67 northbound in 18 flying days.

Manitoba's threshing was practically complete for 1981 in the first week of October, according to the weekly crop statement of the Canadian Pacific Railway department of agriculture. Saskatchewan was then 61 per cent, with aerthern areas in each province still holding heavy crops ripening for the machines.

His Excellency the Earl of Bessborough, Governor-General of Canada, together with his eldest son, Viscount Duncannon, have in view hunting and fishing trips in New Brunswick next year. During his recent visit to the province, His Excellency was presented with a complimentary hunting and fishing license by Hoa. C. D. Richards, Premier of New Brunswick.

Completion of organization work of the Dominion Agricultural Credit Company was announced recently by E. W. Beatty, chairman and president of the Canadian Pacific Railway, who stated that "subscription to over sixty percent of the capital stock of the company have been received and the requisite steps to complete the organization have been taken." Head office of the company will be in Regina.

The new dental car, built by the Canadian Pacific Railway and equipped by the Rosedale, Toronto, Chapter of the I. O. D. E., was turned over for use in Northern Ontario to the Ontario Government, recently This car. ern Ontario to the Ontario Government recently. This car, claimed to be unique on the continent, will have running rights over all railway lines in Northern Ontario and is equipped with fully modern dettal facilities, waiting room, living accommodation, laboratory, consulting room, clinic and dental chair.

The number of Canadians who are part owners of the Canadian Pacific continues to increase. A year ago, on September 2, the total number of the company's Canadian stockholders was 26,185. On September 1 of this year the number had grown to 35,217, an increase of 9,032 shareholders. Many of these have been added since the recent break in the security markets carried stock prices to new low levels indicating that Canadians have confidence in the country's ability to dence in the country's ability come back" to prosperity. Unclaimed Rewards

IT is surprising to note the large number of rewards offered from time to time which still remain unclaimed and the offers of which still remain good.

offers of which still remain good.

The largest reward ever offered by the British Government was \$150,000. It was offered in 1745 for the capture of the Young Pretender. I'm not sure whether this was a "dead or alive" proposition. If so the British Government is well advised to repeal the offer because there is no telling what these rocky times may prompt the seeker after wealth to do. "A few years are the Soviet

A few years ago the Soviet government of Russia offered twenty million roubles to the person who would capture and deliver Ossip Lietnyl, who had been Soviet governor of the State of Tsaritan. Ossip and a few friends lit out for seeme other parts and, so far as I know, are still enjoying the open air.

The World's Grain Exhibition and Captures to see the Recommendation of the company of the open air.

The World's Grain Exhibition and Conference to meet at Regime in 1932 has over 1,700 standing offers to anybody in the world. The largest of these is an offer of \$50 a pound for 50 pounds of wheat—\$2,500—to any person in the world who will deliver the best sample on or before March 1st, 1932. Among the other big fellows is one of \$80 s cob for the best ten ears of corn—\$800. A lot of people are going to wis some easy money next year. This beats the sweepstake plan all bollow. Nothing is left to chance or good luck. If you "deliver the goods" you get the cash.

The International Association of Automobile Clubs in 1918 offered a sum of \$100,000 for a perfect substitute for gasoline of such a nature that it could not be monopolized.

To the inventor of a machine which will efficiently pull and tog sugar beets another award of \$10,000 has been offered. An Old Country paper says:

An Old Country paper says:

"Some years ago, the importation into Britain of aigrettes, the white feathers of the egret, was forbidden and feather merchants offered a sum of one hundred pounds to anyone whe could devise a method of keeping the egret in captivity. This is one more example of a prise that has never been won."

The hope of reward—some kind of reward—while the source of more evil, is at the same time, a greater impulse for good than anything clase in the world. It is man's greatest incentive to action.

In a small village in Ireland, the mother of a soldier met the village preist, who asked her if she had had bad news. "Sure I have," she said, "Pat has been killed.

"Oh, I am very sorry," said the priest, "Did you receive word from the war officer?"

"No," she said, "I recieved word from himself."

The priest looked perplexed and said, "How is that?" "Sure, here's the letter, read

it for yourself," she said. The letter said, "Dear mother. I am now in the holy land."

WAGIN' TUNG

Vol. 1, Nº. 10 Arrowwcod, Oct. 22, 1931

Who Wants to Curl?

Let us all get together and arrange for this popular sport for the winter months. Who will take the initiative and arrange for a get-together meeting and talk over the situation?

I heard today that your on is an undertaker. thought you said that he was

"Not at all. Sir I said he followed the profession."

Now that's a case of saying what you mean but leaving the other fellow to jump at conclusions. You are placing yourself in the same predicament if you are contemplating buying a washing machine and do not buy a Maytag You get features on a Magtag that you do not get in any other machine. We in any other machine. We will be glad to tell you all about the "New" Maytags, and don't forget that we have them in two styles and prices, both possessing all the features of the "New" May-

John Holoboff, from near Mossleigh, recently fractured his hand severely. It wasn't John's fault at all as he had John's fault at all as he had been so used to cranking and cranking that old engine and then it did not start, he was taken off his guard when he went to start his new John Deere pump engine. He likes his new possession very much and certainly begrudges start to the start his new John constructions of the start his new John

all the hours spent in trying to start his old engine. 0

"Mother, we've had the best time playing postman," exclaimed the small young hopeful of the family. "We gave a letter to every lady in the block."
"But where did you get the

letters, dear?

"Oh, we found em in your trunk in the attic, all tied up with blue ribbon.
